Make Your Orchard More Profitable by planting "HARRISON-GROWN" Fruit Trees

The Reasons For The Superiority Of
Harrison Grown Fruit Trees

- 1—Absolutely True to Name
- 2—Healthy—Vigorous
- 3—Disease free
- 4—Hardy
- 5—Properly hardened off before digging
- 6—Propagated from bearing trees of selected strains
- 7—Come into bearing earlier
- 8—Yield bigger crops of better fruits
- 9—Have larger roots
- 10—Take hold quickly in new locations
- 11—The best trees for less money

BETTER TREES

Now Every Planter Can Buy Dependable
True to Name Harrison Grown Fruit Trees at
Prices No Higher Than the Ordinary Tree.

Harrisons' Fruit Trees Bear Prize Winning Fruits
North — East — South — West

TRUE TO NAME

In addition to carefully selecting the propagating wood from bearing trees of superior strains we have also employed the services of Dr. J. K. Shaw, Research Professor of Pomology of Massachusetts State College, Amherst, Mass., and of Dr. W. H. Upshall of the Vineland, Ontario, Canada Experimental Station. These two men are the World's foremost fruit identification specialists and they have pronounced our trees true to name.

PLANT HARRISONS' TREES

BUY YOUR TREES FROM A DEPENDABLE SOURCE

- A—Our organization has over 55 years experience.
- B—Every step in growing under the personal supervision of the Harrison brothers.
- C—One hundred thousand trees in our own orchards from which our propagating plants are selected.
- D—Use of modern methods for planting, cultivating and digging.
- E—Over 5000 acres of various types of soil.
- F—Ideal soil and climatic conditions.
- G—Cooperation with leading horticulturists and experimental stations all over the world.

HARRISONS' SPECIALTIES

Fruit Trees — Strawberry Plants — Grape Vines
Asparagus Roots — Small Fruits — Roses — Shade
Trees — Evergreens — Shrubs — Vines — Hedge
Plants — Azaleas — Boxwood — Peonies — Vines

FALL PLANTING SEASON

Fall and early winter after a few cold periods and before the ground is frozen during the months of late October, November, and early December, depending on your location, are recognized by the most experienced planters as one of the best times for planting most kinds of fruit and ornamental nursery stock.

BUYING FRUIT TREES IS AN ACT OF CONFIDENCE

Your future success and profit from your investment depends on factors you cannot see, the skill and experience of the nurserymen, the type of parent tree that is used in propagation, the willingness of the nurserymen to stand back of every one of his claims.

For 56 years the Harrison organization has been supplying fruit trees to an ever widening circle of customers, until today Harrisons' Nurseries are the largest growers of fruit trees in the World. This demand we believe is due to the profit producing proven heavy yielding, bud selected strain fruit trees we are producing plus absolute dependability and square dealings. Thousands of

reports from enthusiastic customers, hundreds of year in and year out customers are proof that you can Depend on Harrisons' Fruit Trees. You buy them without risk and with assurance they will yield you the greatest possible profit.

THE LATE RIPENING PEACH YOU HAVE BEEN WAITING FOR

The Rio Oso Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size, averaging in diameter from 2 3/4 to 3 3/4 inches, deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, juicy, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

Bears Heavier Than Elberta

Rio Oso Gem is an extremely heavy bearer and on account of its prolific set of fruit, it is necessary to practice extremely heavy thinning. It has hardy, vigorous fruit buds, which insure it being a heavy annual bearer. The tree bears young.

Ripens Two Weeks Later Than Elberta

The Rio Oso Gem would be a peach of commercial importance when ripening at any time during the peach season, but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for peaches.

Colors Before It Ripens

An amazing feature of the Rio Oso Gem is, it will take on a good bright red color and yellow background two weeks before ripening, and even ten days before actual ripening time the percentage of bright red color is decidedly more than most other varieties. When Rio Oso Gem is ready to pick and ship it has practically a solid red color. There is no other peach known that carries such a high percentage of red color on the fruit as this marvelous Rio Oso Gem.

Expert Fruit Growers Say O. K.

Rio Oso Gem has now fruited in practically every peach district of the Union. Veteran peach growers of the nation are loud in their praise of this startling variety. Rio Oso Gem has passed the experimental stage and proven an outstanding commercial variety superseding the famous Elberta of the Victorian era.

CERTIFIED—100% HEALTHY TREES

NEW VARIETIES OF RECENT INTRODUCTION

SUMMER APPLES

ANOKA. Striped red. Bears when extra young.
CARLTON. Resembles Red Astrachan. Desirable.
CRIMSON BEAUTY (Red Bird). A very early red apple. (1 yr. trees only).
EARLY MCINTOSH. Red, attractive, good size, flesh white, fine, tender, juicy. Tree vigorous, hardy, healthy and productive.
LARGE TRANSPARENT (Lodi). An improved Yellow Transparent, large, fruits earlier in the season.
MELBA. A seedling of McIntosh. Good size, early.
MILTON. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor.

AUTUMN APPLES

KEETOSH. A seedling of McIntosh. Canadian origin.
KENDALL. McIntosh seedling. Same season as McIntosh, but keeps longer.
LOBO. Similar to McIntosh but colors earlier.
MAMMOTH GRIMES. A big golden apple.
ORLEANS. Delicious type, bears early.

WINTER APPLES

GALLIA BEAUTY. A Rome Beauty type of apple identical in every respect, except its earlier coloring qualities.
MACOUN. Similar quality and texture as McIntosh, but ripens later.
MEDINA. Delicious type, slightly larger, recommended for trial where Delicious grows too small.
NEWFANE. Delicious type, large size, attractive red color.
SWEET DELICIOUS. Very sweet in flavor. Delicious type.
TURLEY. Seedling of Winesap. Fruit rounded conical in shape, much larger than Winesap, smoother skinned and deeper and richer in color; juicy and rich flavor.

WE CAN SUPPLY THE FOLLOWING NEW SUPER RED BUD SPORTS

BRIGHT-RED-JONATHAN: Growers who are making a good profit with common Jonathan can almost double their profits with this new red strain.

CHERRY-RED-STAYMAN: The ever popular Stayman Winesap has produced many bud sports. This Cherry Red Stayman is darker in color than our Scarlet Red Stayman, but it is lighter in color than Dark Red Stayman.

DOUBLE-RED-BALDWIN: Although the common Baldwin is being gradually replaced by other varieties this double Red Strain will bring new profits to the grower of Baldwins. (1 yr. trees only).

DARK-RED-STAYMAN: Almost black in color, starts coloring extremely early. Otherwise characteristics same as Stayman Winesap.

EARLY-RED-DUCHESS: Highly colored early apples bring premium prices, this bud sport colors red all over early in the season.

NEW-RED-SPY: Bright Scarlet Red Coloring weeks before Northern Spy.

RED GRAVENSTEIN: Much better color than the original Gravenstein. Has practically replaced the old strain of well known Gravenstein.

RED-ROME-BEAUTY: By far the best red strain of Rome Beauty obtainable. Has that Bright Scarlet Red Color that is universally popular with the consumers.

RED-SUMMER-RAMBO: A new earlier coloring solid red strain, means much greater profits for growers everywhere.

RED-YORKING: Will eventually replace the famous York Imperial. Colors 3 to 5 weeks ahead of its parent.

SCARLET-RED-STAYMAN: Bright Red Color weeks earlier. Has all the best qualities of the other strains of Stayman. Its 100% red color will demand premium prices on the markets. (1 yr. trees only).

SOLID-RED-WINESAP: Old Winesap has good color but this new strain produces a still higher percentage of extra fancy fruit.

SUPER-RED-MCINTOSH: An improvement on our already famous strain of McIntosh Red. Color is slightly darker and commences to color weeks earlier.

TRIPLE-RED-DELICIOUS: The king of all Red Apples. Solid Bright Red Color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrissons' Triple Red Delicious to insure your future financial income.

STANDARD VARIETIES — HEAVY BEARING STRAINS

SUMMER APPLES

DUCHESS (Duchess of Oldenburg). Large, red striped.
EARLY HARVEST. Medium size, yellow.
RED JUNE (Carolina). Medium size, red.
SPITZENBURG. Deep red.
STARR. Large, yellowish, smooth skin.
SUMMER RAMBO. Large, splashed with red.
SWEET BOUGH. Pale yellow, large, tender, sweet. (1 yr. trees only).
WILLIAMS EARLY RED. Medium to large size, bright rich red; flesh is crisp, tender, juicy, sub-acid, good quality.
WILSON RED JUNE. Fairly large, red.
YELLOW TRANSPARENT. Medium size, greenish yellow, very heavy bearer. Most widely planted yellow early variety.

AUTUMN APPLES

FAMEUSE (Snow). Pure white flesh, very good.
GRAVENSTEIN. Large streaked and splashed with red.
GRIMES GOLDEN. Medium size, yellow, heavy bearer, excellent flavor. Most popular sort for home plantings. Also an ideal pollenizer for Stayman Winesap and many other varieties.
JEFFERIES. Tender, excellent quality.
JONATHAN. Medium to large, red, juicy. Good keeper and an excellent shipper.
KING DAVID. Very dark red, medium size. (1 yr. trees only).
KINNARD. Large, dark red, very juicy.
MCINTOSH RED. Medium large size, generally considered highest and best flavored apple grown. Splendid appearance which sells it on sight.
MAGNUM BONUM. Red, popular in South.
MAIDENS BLUSH. Large, red blush.
NORTHWESTERN GREENING. Very large, greenish-yellow, good shipper. Popular for baking.
SMOKEHOUSE. Large, yellow-green mottled with dull red. Fine flavor.
WEALTHY. Medium to large size fruits, hardy, bears regularly.
YELLOW DELICIOUS. Golden yellow apple with decided "delicious" characteristics. Yellow Delicious has a remarkably good flavor and is most popular for eating during fall and winter months.

WINTER APPLES

ALBEMARLE PIPPIN (Yellow Newtown). Large, round ribbed and somewhat irregular.

ARKANSAS BLACK. Dark red. Good keeper.
BALDWIN. Large, red, yields big crops, good keeper.
BEN DAVIS. Large, good looking, poor flavor.
CORTLAND. Red. Cross between McIntosh and Ben Davis.
DELICIOUS. Red, large, very high flavored. One of most popular and highest priced apples grown.
GANO (Black Ben Davis). Bright red, medium to large.
GILBERT (Arkansas). Dark red, heavy bearer.
LOWRY. Mahogany red. Very popular in Virginia.
MAMMOTH BLACK TWIG (Paragon). Extra large, dark red, good flavor.

MOTHER. Medium size, red, late bloomer.
NERO. Bright red, large, extra good keeper, fine flavor.
NORTHERN SPY. Large, bright red with yellow markings.

OPALEScent. Very handsome dark crimson.
RHODE ISLAND GREENING. Extra large, greenish yellow.
ROME BEAUTY. Large, round, red, flavor and quality above average.

ROXBURY RUSSET. Large, yellow brown russet. Best of all russet varieties.

STARK. Extra large, greenish yellow with red blush.
STAYMAN WINESAP. Large, red, extra good flavor, juicy and quality ranking with the best.

TERRY. Medium size, red.
TWENTY OUNCE. Very large, fine quality, yellow striped red.

WAGENER. Bright red, excellent quality.
WINESAP. Medium size, dark red, high flavor. One of best and longest keepers.

WINTER BANANA. Extra large, golden yellow, shaded with red. Very highly flavored.

WINTER RAMBO. Medium size, greenish yellow color.

WOLF RIVER. Extra large, red.

YATES. Yellow splashed with red. Popular in the South.

YELLOW BELLEFLOWER IMPROVED. Large, yellow, good flavor.

YORK IMPERIAL. Red, medium to large size. Widely planted in Appalachian area.

CRAB APPLES

DOLGO. Full of juice, jells easily. Trees hardy, vigorous, productive. New. (1 yr. trees only).

HYSLOP CRAB. Crimson color, large.

TRANSCENDENT. Best of all crab apples, good size, yellow skin, striped with red.

YOUNG AMERICA. Attractive red fruit of excellent size and quality. Good as ornamental.

ELBERTA

Peach Trees Are Your Best Bet

Harrisons' Peach trees are the best peach trees you can plant in your orchard. Our superior Berlin climate and soil plus Harrisons' method of propagating, planting, budding, spraying, pruning, digging, grading and packing are what make the fine trees. If we could get you to come to Berlin we could show you all the details. If you cannot come and will send us your order we will stake our reputation on the promise that you will get the very best trees that can be grown.

RELIABLE STANDARD VARIETIES. Worthy Commercial kinds. Equally as good for home and local markets.

BELLE OF GEORGIA. (Belle), Midseason. Large, white freestone, recognized as the best all around white peach. Should be included in every planting. Very hardy and productive.

BRACKETT. Midseason late. The fruit is rich yellow with dark carmine cheek. Size is as large or larger than Elberta and much better flavored. Begins to ripen a few days after Elberta.

CUMBERLAND. Early. White, semi-freestone.

EARLY ELBERTA. Early midseason. Yellow, freestone, large, lemon yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor, rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning.

EARLY HILEY. Early. An earlier maturing strain of Hiley.

EARLY ROSE. Very early. Another Favorite Commercial Peach. White, cling, medium large size for an early Peach, high bright red skin, sweet, delicious flavor. Good shipper, making it a new favorite among commercial varieties.

ELBERTA. Midseason. The Greatest and Best Money-Making Peach. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. This attractive appearance and the uniform large size serve to sell it almost on sight. We offer original strain trees which is the the best strain obtainable.

ECLIPSE. Early midseason. Yellow freestone, bears large crops.

FAIRS BEAUTY. Early midseason. Yellow, freestone, medium to large size.

GAGE ELBERTA. Midseason. Very similar to Elberta. Partially immune to bacteriosis.

GOLDEN JUBILEE. Early. The Supreme Early Yellow Peach. Commercial peach orchardists for a century have been looking for an early peach of high quality, fine flavor, yellow, freestone, attractive color and firm texture and eventually they have found it in the marvelous Golden Jubilee. This variety is a sensation of recent introduction of new varieties and is by far better than any early variety of commercial importance which has been introduced in many years. It ripens about four days ahead of Carman.

HALE HAVEN. Early midseason. Yellow freestone, colors before ripening, heavy bearer. Being planted in every peach section.

HILEY. Early midseason. Bears huge crops of fancy peaches. White, freestone, medium size, highly red colored and is a very handsome, peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. You can depend on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the markets.

J. H. HALE. Midseason. Extra Large Size. Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about two or three days prior to Elberta. We offer original strain trees.

KRUMMELS (Krummels Late October). Very late. Yellow, freestone, round, fine flavor.

RED BIRD CLING. Very early. White, cling, extra large with a bright red blush, the first peach of large size to ripen; the greatest very early money maker.

RIO OSO GEM—See description on page 1.

ROCHESTER. Early midseason. Yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone peaches for nearby markets, and highly desirable for canning.

SALBERTA. Late. Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salwey.

SALWEY. Very late. Yellow, freestone.

SHIPPERS LATE RED. Late. Large, round, yellow, freestone, very attractive.

SOUTH HAVEN. Early midseason. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days ahead of Elberta. Tree is very hardy, good grower and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates.

OLDER VARIETIES—Suitable for planting in certain sections. Also ideally adapted for home use and local markets.

ADMIRAL DEWEY. Very early. Yellow fleshed, freestone, productive.

ALTON. Early midseason. White, semi-free.

BEERS SMOCK. Very late. White, freestone.

BERKS FAVORITE. Late. White, freestone.

CARMAN. Early. Semi-freestone, medium size, white.

CHAMPION. Early midseason. White, freestone, very large, creamy white with red cheek, sweet, juicy; very high flavor.

CRAWFORD EARLY. Early midseason. Yellow freestone, juicy, sweet flavored, prolific bearer.

CRAWFORD LATE. Late. Yellow, freestone, and old commercial favorite.

FOX SEEDLING. Late. White, freestone.

GOLD DROP. Late. Yellow, freestone.

GREENSBORO. Very early. White, freestone, hardy, big crops.

INDIAN. Midseason. Yellow, freestone, very rich, juicy flavor.

IRON MOUNTAIN. Late. White, freestone.

MAMIE ROSS. Early. White, freestone, large size.

MAYFLOWER. Very early, earliest of any variety. White, cling, small size with red all over.

NEW PROLIFIC. Midseason. Yellow, very vigorous, healthy, medium size fruit.

NIAGARA. Midseason. Yellow, freestone.

OLD MIXON FREE. Late. White freestone, good flavor.

ROBERTA (Augbert). Late. A comparatively new variety of great merit. Resembles the Elberta in many respects, but ripens about a week or ten days later. An excellent sort to prolong the Elberta season.

SLAPPEY. Early midseason. Yellow, freestone, rich juicy and extra good flavor.

UNEEDA. Very early. Cling. Skin creamy white, with red blush.

WILMA. Late, Yellow, freestone.

YELLOW ST. JOHN. Early midseason. Yellow, freestone.

WHITE HEATH CLING (Heath). Very late. White, round, cling. Favorite for canning and pickling.

AMERICA'S LARGEST GROWERS OF PEACH TREES

BARTLETT PEARS

HARRISON GROWN PEAR TREES

BUDDED ON BLIGHT RESISTANT ROOTS

BARTLETT. Large, rich golden-yellow, with a light red blush when ripe; buttery, juicy, melting, with a very rich, pleasing flavor. Bartlett is without a peer, having won an international reputation as the best and the most profitable commercial pear and also the finest home-orchard variety. Early.

BEURRE BOSCH. Large size, fine quality, brings highest market price. Late.

BEURRE D'ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.

CAYUGA. Flesh is firm and fine texture quite to the center and possesses a delectable flavor. New.

CLAPPS FAVORITE. Large size, hardy and very productive. Thrives where other varieties fail. Very early.

DOUGLAS. Very resistant to blight. A winter pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.

DUCHESSE. Very large, dull greenish-yellow. Tree somewhat dwarf but a dependable bearer. Late.

EWART. Large size and good quality. Greenish yellow netted with russet, and has a fine, melting, tender, juicy flesh. New.

GARBER. Large, clear yellow, heavy bearer. Fine market variety; unsurpassed for preserves.

GORHAM. Flavor is sweet and vinous with a very marked and pleasing aroma. Flesh is white, tender, buttery and juicy. Valuable for dessert and canning. New.

KIEFFER. Fruit large, skin yellow with light vermillion cheek. Most popular canning pear. Late.

KOONCE. One of the earliest pears, free from blight, does not rot at the core like many early pears. Fruit is yellow, medium to large, delightful flavor. Very productive.

PHELPS. Flesh is tender and juicy with a pleasant vinous flavor. New.

PULTENEY. New variety originated by the New York Experimental Station. Fruit is of the Bartlett type, a little more regular in outline, skin smoother.

SECKEL. A beautiful and delicious little pear. One of the richest and highest flavored pears grown. Tree dwarf, bears prolific crops. Late.

SHELDON. Medium size, flesh slightly coarse, melting, juicy, late.

WINTER NELIS. A sweet rich pear for winter use. The trees are not very vigorous but are adapted to most soils and are productive. For home and market.

WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Midseason.

For Commercial and Home Plantings

HARRISON GROWN PLUM TREES

AMERICA'S BEST VARIETIES

This is an expert selection made from hundreds and hundreds of known varieties of plums, which we have fruited, thus selecting only the super-strain varieties, which are suitable for all purposes. You can depend on Harrison-Grown Plum trees, being hardy and producing bumper crops each year.

EARLY TO BEAR

ABUNDANCE. Early, large, lemon-yellow, hardy, productive.

BLUE DAMSON. Very similar to Shropshire Damson. Late.

BRADSHAW. Midseason, large, dark violet-red, juicy, excellent flavor. Desirable for canning.

BURBANK. Midseason, large cherry-red, high quality, very productive. Popular commercial variety.

GERMAN PRUNE. Late, large, dark purple, sweet. Good for canning and drying.

IMPERIAL GAGE. Midseason, yellow, medium size, very particular as to soil requirements.

ITALIAN PRUNE (Fellenberg). Late, medium size, dark purple, delicious. Fine for drying.

RED JUNE. Very early, medium size, deep vermillion-red; good.

SANTA ROSA. Large size, firm, flavor, good eating qualities, reddish in color.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

SUPERIOR. Large size, red, firm flesh, delicious quality.

UNDERWOOD. Very large beautiful red color. Delicious quality.

WICKSON. Late, very large, deep maroon-red covered with white bloom, flesh firm, meaty, yellow, rich, aromatic, cling.

WILD GOOSE. Red, tender, refreshing flavor, very early.

NECTARINES

DELICIOUS FOR EATING

There is a mistaken idea that the nectarine is a cross between the peach and something else, while it is really nothing more or less than a smooth-skinned peach. The melting, juicy texture of the nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

BOSTON. Bright yellow, red cheek, flesh yellow.

GOLD MINE. White flesh, large, attractive, freestone.

GOWER. Large, white flesh, freestone, good flavor.

HUNTER. Large, round, yellow, freestone.

JOHN RIVERS. Early, medium size, red, semi-cling.

STANWICK. Very large, attractive, white, freestone, good flavor.

SURE CHOP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

APRICOTS

The apricot is one of the most delightfully luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

ALEXANDER. Early, prolific, freestone, orange with red blush; very juicy and sweet flavor. A large prolific bearer that will withstand adverse weather conditions. This variety deserves greater popularity.

EARLY GOLDEN. Small, pale orange, juicy and sweet. It is a hardy, prolific bearer; ripens first of July.

NEWCASTLE EARLY. Early, medium size, good color, fair in quality.

SUPERB. Medium size, light salmon-colored fruit; hardy.

TILTON. Very large, highly colored.

WENATCHEE MOORPARK. An improved strain of Moorpark.

HARRISON GROWN CHERRY TREES

Budded from bearing commercial orchards of superior strains. All cherries are budded on hardy grown, whole root seedlings, which, in our most favorable soil, form a large, fibrous, well proportioned root system, which is exceedingly important for the proper growth of cherries. Highest quality at most attractive prices.

DYEHOUSE. Ripens a week ahead of Early Richmond. The earliest good sour cherry.

EARLY RICHMOND. Exceedingly hardy and productive.

ENGLISH MORELLO. Large, blackish-red cherry. Hardy and productive. Very late.

MAY DUKE. Very early, productive, and old time favorite.

MONTMORENCY (Large Montmorency). Midseason, sour, large, sound and red, slightly acid; flesh is very tender and of unusually good quality, being by far the best variety of sour cherry grown. The best shipper of all sour, which with its wonderful carrying ability for long distance shipments, along with its handsome, appetizing appearance and large size, has made Montmorency in a class by itself, always commanding the highest market prices.

OLIVET. Large, deep red, glossy cherry with rich vinous sub-acid flavor. Morello type. Midseason.

RICHMORENCY. A Montmorency type that ripens a week or more earlier than Large Montmorency. Produces heavy crops and the size of the fruit is large.

ROYAL DUKE. Sour, dark red, fair quality. Early.

Harrison Grown Sweet Cherry Trees

What fruit is more pleasing than the sweet cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

ABUNDANCE. Large yellow, very productive, attractive. Midseason.

BING. Very large dark brown, flesh firm, sweet. Midseason.

BLACK TARTARIAN. Very large, sweet, purplish-black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early.

GOLDEN WAX. Large, yellow, fine flavor. Bears bumper crops. Easily grown. Midseason.

GOVERNOR WOOD. Large, light yellow, marked with red, sweet flavor.

LAMBERT. Extra large, sweet, jet black, very popular. Midseason.

LYONS. Large, black, extra early, ripens a week ahead of Black Tartarian.

NAPOLEON (Royal Anne). Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason.

SCHMIDT (Schmidt's Bigarreau). Large, sweet, deep, black, tender, fine flavor. Midseason.

WINDSOR. Large, sweet, almost black, fine quality. Valuable late variety.

YELLOW SPANISH. Large, sweet, yellow with red tinge. One of the most beautiful and popular of the light colored cherries. Heavy bearer. Midseason.

It Will Pay You to Plant Harrison's Selected Strain Strawberry Plants Because:

- 1—Grown on our own farms under our own personal supervision.
- 2—Thousands of acres of land whereby we can select the best type of land for plant production.
- 3—Use of modern machinery in planting and cultivating.
- 4—All plants freshly dug at shipping time.
- 5—Packed securely in slatted wooden crates with moisture retaining sphagnum moss around the roots of the plants.
- 6—Only selected strain plants, those exhibiting the best yielding and plant growth are used in our propagation.
- 7—Enough experienced labor to dig and clean hundreds of thousands of plants daily.
- 8—Grown in sandy loam soil that produces big fibrous roots.

Strawberry Plant Shipping Season November 1 to May 15.

HARRISON HI QUALITY GRAPE VINES

This season brings to Harrison's customers one of the finest crops of fruit trees and grapevines we have ever had. Climatic conditions this year were exceptional, resulting in root growths for which every planter will gladly pay premium prices.

The soil on which our vines are grown is especially adapted to root growth. Our propagating stock is selected from healthy, vigorous, heavy bearing vines. This results in a vine that will give you 100 per cent satisfaction in your vineyards.

Our sandy loam soil is especially adapted for growing big rooted Grape Vines. We have about 500,000 thrifty one and two year roots to offer this season. If interested in 1000 or more send us your list for quotations.

Harrison's Grape Vines Bear Big Crops

What Makes Harrison Grown Strawberry Plants Better

- 1—Bigger crops of better fruit from the same acreage.
- 2—Absolutely Free from Diseases and Insects.
- 3—Will transplant satisfactorily in any section.
- 4—Quantity production and low selling costs enable us to sell our quality plants cheaper.
- 5—Absolutely True to Name and of the heaviest bearing strain obtainable.
- 6—Shipment at the time you desire.
- 7—The responsibility of our 56 year old nursery.

Harrison' Grown Mary Washington ASPARAGUS CROWNS

Heavy Pedigreed Strain Crowns

We have made a specialty of growing asparagus roots for over 40 years and have supplied plants for some of the finest asparagus beds in the country. The growing, handling, and shipping of millions of asparagus roots has taught us many things and today we are in position to supply you with quality roots at low cost. All our crowns were grown from the original strain of seed.

RUST RESISTANT—PROFITABLE

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Evergreens For Year Around Beauty

AMERICAN ARBORVITAE. The largest seller of all Arborvitae. Erect, pyramidal habit, bright green foliage, dense from ground up. Rapid grower.

CHINESE ARBORVITAE (*Biota orientalis*). Rather stiff columnar habit, bright green foliage. Very attractive.

IRISH JUNIPER. Forms a narrow and dense column, compact, bluish-green foliage. Most attractive when planted around the foundation of a home, at corners and entrances. Widely used in formal gardens.

SWEDISH JUNIPER. Tall, columnar habit, dense, fairly broad foliage, drooping tips.

Prices of above varieties:	Each	2 for	10 for
18 to 24 inches	\$0.90	\$1.60	\$7.00
2 to 3 feet	1.25	2.20	9.50
3 to 4 feet	1.75	3.20	14.50
4 to 5 feet	2.50	4.50	20.00
5 to 6 feet	3.50	6.50	30.00

SPREADING EVERGREENS

ANDORRA JUNIPER. Low spreading type, purple bronze color during winter.

PFITZER'S JUNIPER. Most popular spreading evergreen.

SAVIN JUNIPER. Spreading vase shaped growth. One of the most attractive spreading evergreens.

Prices of above varieties:

	Each	2 for	10 for
12 to 15 inches	\$0.90	\$1.60	\$7.50
15 to 18 inches	1.25	2.20	10.00
18 to 24 inches	1.75	3.20	14.50
2 to 2½ feet	2.50	4.50	20.00
2½ to 3 feet	3.50	6.50	30.00

NORWAY SPRUCE (*Picea excelsa*). Open pyramidal growth, planted everywhere, hardy.

PLUME-LIKE RETINOSPORA. A handsome evergreen from Japan with feathery foliage. Upright grower, broad at base, excellent for foundation plantings. We offer it in green or golden foliage.

PYRAMIDAL ARBORVITAE (*Thuja occidentalis* pyramidalis). A really beautiful evergreen that should be included in every planting. It grows tall and narrow requires no trimming and retains its bright green color throughout the whole year. A pair of them placed at the entrance or at the corner of a house makes a superb showing.

VEITCH'S JAPANESE RETINOSPORA (*Retinospora squarrosa* veitchii). Foliage silvery blue, feathery and dense, giving soft wooly appearance. Broad pyramidal outline. One of the best *Retinosporas*.

Prices of above varieties:	Each	2 for	10 for
18 to 24 inches	\$1.10	\$2.00	\$9.00
2 to 3 feet	1.50	2.70	12.00
3 to 4 feet	2.00	3.70	17.00
4 to 5 feet	3.00	5.50	25.00
5 to 6 feet	4.00	7.50	35.00

BOXWOOD

DWARF ENGLISH BOXWOOD (*Buxus sempervirens* suffruticosa). A widely known and popular form of dwarf boxwood. It has small, deep green, dense leaves which hold their bright color throughout the winter months. Suitable for low hedges and edgings. Can be trimmed in various forms.

	Each	2 for	10 for	100 for
3 to 4 inches	\$0.25	\$0.40	\$1.50	\$10.00
4 to 6 inches	.30	.50	2.00	15.00
6 to 8 inches, B&B	.50	.90	4.00	38.00
8 to 10 inches, B&B	.70	1.20	5.00	48.00
10 to 12 inches, B&B	1.00	1.80	8.00	75.00
12 to 15 inches, B&B	1.50	2.70	12.00	110.00

(50 or more at 100 rate)

AMERICAN BOXWOOD (*Buxus sempervirens*). Handsome shrubs of dense, compact growth. Leaves evergreen, quite small, deep glossy green. An ideal plant, more extensively used for shaping in various forms than possibly any other evergreen.

	Each	2 for	10 for	100 for
3 to 4 inches	\$0.25	\$0.40	\$1.50	\$10.00
4 to 6 inches	.30	.50	2.00	15.00
6 to 8 inches, B&B	.40	.60	2.50	23.00
8 to 10 inches, B&B	.50	.90	4.00	38.00
10 to 12 inches, B&B	.60	1.00	4.50	43.00
12 to 15 inches, B&B	.80	1.40	6.00	55.00
15 to 18 inches, B&B	1.00	1.80	8.00	75.00
18 to 21 inches, B&B	1.50	2.70	12.00	110.00

(50 or more at 100 rate)

BLUE TINTED EVERGREENS

MEYERS JUNIPER. Grows irregular, blue color, handsome.

SPINY GREEK JUNIPER. A tall grower of upright columnar habit and bluish-green foliage. The growth is so slow that the tree is well adapted for foundation plantings and other situations requiring dwarf trees.

VIRGINIA BLUE JUNIPER. Broadly conical form and beautiful glaucous-blue foliage make it one of the choicest evergreens.

Prices of above varieties:	Each	2 for	10 for
18 to 24 inches	\$1.50	\$2.70	\$12.00
2 to 3 feet	2.00	3.70	17.00
3 to 4 feet	3.00	5.50	25.00
4 to 5 feet	4.00	7.50	35.00

COMPACT GLOBULAR ARBORVITAE (*Thuja occidentalis* compacta). Natural compact, globe-shape, dark green foliage. The ideal low-growing plant for massing against the taller evergreens in foundation plantings.

	Each	2 for	10 for
15 to 18 inches	\$0.80	\$1.40	\$6.00
18 to 24 inches	1.25	2.20	9.50
2 to 2½ feet	1.75	3.20	14.50

IRISH YEW (*Taxus baccata* hibernica). This evergreen is the aristocratic member of the Yew family. It grows tall and narrow with stout, crowded branches and spirally arranged leaves which are dark green in color. Fortunately, we have some specimen plants in our nurseries from which we are able to propagate.

	Each	2 for	10 for
12 to 15 inches	\$1.25	\$2.20	\$9.50
15 to 18 inches	1.50	2.70	12.00
18 to 21 inches	2.00	3.70	17.00
21 to 24 inches	2.75	5.00	23.50
2 to 2½ feet	3.50	6.50	30.00
2½ to 3 feet	5.00	9.00	40.00

JAPANESE SPREADING YEW (*Taxus cuspidata*). The beautiful yew of moderate bushy growth, the upright spreading branches densely clothed with short leaves of dull green. Hardest of all yews, grows in semi-shady locations.

SPREADING ENGLISH YEW (*Taxus baccata* repandens). Low spreading, dwarf grower, with dark, glossy green foliage.

	Each	2 for	10 for
12 to 15 inches	\$1.25	\$2.20	\$9.50
15 to 18 inches	1.75	3.20	14.50
18 to 21 inches	2.50	4.50	20.00
21 to 24 inches	3.50	6.50	30.00

UPRIGHT ENGLISH YEW (*Taxus baccata* capitata). Upright grower, dense, green foliage. Makes a most attractive specimen plant when fully matured.

	Each	2 for	10 for
12 to 15 inches	\$1.00	\$1.80	\$8.00
15 to 18 inches	1.50	2.70	12.00
18 to 24 inches	2.00	3.70	17.00
2 to 2½ feet	3.00	5.50	25.00
2½ to 3 feet	4.00	7.50	35.00
3 to 4 feet	5.00	9.00	40.00

DWARF JAPANESE YEW (*Taxus cuspidata* nana). An excellent dwarf form of Japanese Yew with fine spreading branches and rich deep green short leaves. Highly recommended.

12 to 15 inches—\$1.25 each; 2 for \$2.20.

HICK'S YEW (*Taxus media* hicksii). A narrow columnar growing form. Dark green leaves. Fast grower.

15 to 18 inches—\$1.25 each; 2 for \$2.20.

AZALEAS

AZALEA HINODEGIRI. Deep carmine blooms, evergreen foliage. The most desirable kind. Spreading dwarf type grower.

AZALEA AMOENA. Rose-purple flowers, blooms in early spring and retains its foliage all year.

AZALEA MACRANTHA. Large, single, salmon-red flowers, late bloomers.

SPECIAL OFFER AZALEA HINODEGIRI
3 to 5 inch, 1 for 25c; 2 for 40c; 10 for \$1.80.

Hedges Make Beautiful Living Fences

CALIFORNIA PRIVET (*Ligustrum ovalifolium*). We grow California Privet by the mile. Most popular hedge plant; can be trimmed to any desired shape. For planting long hedges, this is the most economical variety. Quick grower.

Prices per each plant:

	1 to 9 plants	10 to 49 plants	50 to 299 plants	300 or more plants
8 to 12 in.	\$.05	\$0.04	\$0.03	\$0.02
1 to 1½ ft.	.07	.05	.04	.03
1½ to 2 ft.	.10	.07	.06	.05
2 to 3 ft.	.15	.12	.10	.08
3 to 4 ft.	.20	.17	.15	.12

AMUR RIVER NORTH PRIVET (*Ligustrum amurense*). Hardest of the family with handsome olive green foliage. Best hedge plant for severe climates.

IBOLIM PRIVET (*Ligustrum ibolium*). A cross between California and Iboia Privet with beauty of the former and hardiness of the latter.

Prices of Amur River North and Ibolium Privet

Prices per each plant:	1 to 9 plants	10 to 49 plants	50 to 299 plants	300 or more plants
8 to 12 in.	\$.10	\$0.08	\$0.06	\$0.04

JAPANESE BARBERRY (*Berberis thunbergii*). Best low dense hedge plant grown. Its abundant, small, light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

Prices per each plant: 1 to 9 10 to 49 50 to 299 300 or more

RED-LEAVED BARBERRY (*Berberis thunbergii* atropurpurea). A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out with the shrub foliage depended on for colors.

Harrisons' Ornamental Shade Trees

They Give Immediate Results

AMERICA ELM (*Ulmus americana*). A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers in a tall vase. The handsomest American tree for lawns, avenues and parks.

AMERICAN PLANE OR SYCAMORE (*Platanus occidentalis*). A very rapid growing tree for yard or street planting. The bark is grayish-green and peels off during the winter. Not desirable as the Oriental Plane but it is a much more rapid grower.

CATALPA SPECIOSA. A fast growing large leaved tree.

ORIENTAL PLANE (*Platanus orientalis*). A rapid, upright, clean growing tree, long lived, beautiful dense foliage. It is very hardy and not affected by insects.

SILVER MAPLES (*Acer dasycarpum*). Tall, stately tree, rapid grower, graceful, leaves silvery underneath.

Prices for above varieties:

ALTHEA or Rose of SHARON (*Hibiscus syriacus*). The double and single flowers are formed in varying colors. We can supply double pink, red, white with with crimson center.

BUDDLEIA MAGNIFICA. New and undoubtedly the finest of all the summer-flowering Butterfly Bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose, appear in mid-June.

DOGWOOD, RED-BRANCHED (*Cornus alba sibirica*). Bright red bark, white flowers, blue fruit; rapid grower, beautiful winter effect.

GOLDEN BELL (*Forsythia*). Vigorous, upright grower; profusion of yellow flowers in April. One of our best-early blooming shrubs.

HONEYSUCKLE, JAPANESE BUSH (*Lonicera morrowi*). Early white flowers in June, followed by red berries.

QUINCE, JAPANESE FLOWERING (*Cydonia japonica*). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs.

SPIREA REEVESIANA. Slightly drooping shrub covered in May with clusters of single, white flowers.

SYRINGA; SWEET MOCK ORANGE or GARLAND (*Philadelphus coronarius*). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET SCENTED SHRUB (*Calycanthus floridus*). Hardy native with many double, chocolate colored flowers in May. Flowers, leaves and even wood have a spicy fragrance.

TAMARIX, AFRICAN (*Tamarix africana*). Feathery gray-green foliage, very showy.

TARTARIAN HONEYSUCKLE (*Lonicera tatarica*). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (*Weigela rosea*). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall.

MONEY BACK. In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthfulness to name to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, productiveness or any other matter.

—HARRISONS' NURSERIES, INC.

NORWAY MAPLES (*Acer platanoides*). Most popular and best known shade tree. Green foliage remains until late fall and turns to rich yellow.

SYCAMORE MAPLE (*Acer pseudoplatanus*). Typical maple foliage. A good tree for street or lawn planting.

RED OR SWAMP MAPLE (*Acer rubrum*). Particularly pleasing during the fall when its leaves turn a brilliant red.

MOLINE ELM. Grows into a dense conical specimen.

CHINESE ELM (*Ulmus pumila*). This tree is of recent introduction in this country. It is a very rapid grower.

PIN OAK (*Quercus palustris*). The daintiest and most graceful of the oaks, with deeply cut, bright, fresh green foliage; beautiful autumn effect. A very graceful tree for the lawn and fine for streets or roadsides.

EUROPEAN LINDEN (*Tilia platyphyllos*). Pyramidal in form. Its abundant foliage forms a dense shade.

SWEET GUM (*Liquidambar styraciflua*). A shapely tree with slender, corky-ridged branches. Leaves are bright green and lustrous; in autumn they change to a pleasing tone of crimson color.

Prices of above varieties: Each 2 for 10 for 100 for

Bud-Selected Roses

They Bloom All Summer
Long Stems
Excellent for Cutting

GROWN BY A SENSATIONAL NEW METHOD

Why Harrison Grown Bud-Selected Roses Are Better

Bud selection method of propagation is a definite improvement in rose growing. It results in bigger, brighter, better quality blooms in larger quantities with stronger, healthier growing plants. Each and every plant we grow for sale is the offspring of the plant that was especially selected for its free flowering characteristics, pureness of color and type, vigorous and exceptionally free from diseases.

OUR GUARANTEE

Every Customer is assured of Harrisons' High Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Anytime trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory, however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within six months after its arrival.
